# Matías Falcone

Senior Full Stack Engineer | Cardano SPO | Smart Contract Dev  
Melbourne, Victoria, Australia

## Summary

Long-term contributor to the blockchain ecosystem, focused on building meaningful infrastructure.

I operate a Cardano stake pool and collaborate with projects across multiple networks, with a strong interest in decentralized systems, governance, and long-term vision.

In my spare time, I explore Autonomous Worlds and experiment with blockchain systems by pushing them to their limits — looking for new ideas and more resilient designs for the systems we'll rely on in the future.
